Forecast for Saturday 12 Sep 2020

Weather: Small chance a brief, isolated shower in the morning period. Otherwise much of the day will be dry with some sunshine. Clouding over from the west in the evening, perhaps bringing a little rain to the far north fells after dark.

Chance of cloud free mountain/hill tops above 800m: Some patchy cloud around 500 metres at first, and again late evening, otherwise little in the way of low cloud expected.

Visibility: Very good with good air clarity.

Valley	12/10	13/11	14/12	15/12	14/12	14/11	15/11
Freezing Level*	1600m	1400m	1500m	1600m	1900m	3400m	3400m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Southwesterly winds on the tops will slow progress to some extent, a notable chill expected too.

Forecast for Sunday 13 Sep 2020

Weather: A cloudy and windy day with a little light rain at times, but it won't be raining all the time.

Maximum wind: Southwesterly gusts to 50 mph on the higher summits, making for slow progress

Chance of cloud free mountain/hill tops above 800m: A good deal of low cloud between 500 and 700 metres through the day. Some breaks developing in shelter at times, but these likely to be unreliable. Cloud tending to thin and break more widely in the evening.

Visibility: Rather hazy under cloud cover, however improving somewhat in the afternoon

Temperature: **Valleys:** Plus 8 rising to 17 Celsius
At 800m: Plus 8 Celsius
Freezing level: Above summits
